1 Scope

This document provides information on all system requirements for ARIS Process Performance Manager 10.5.10 and ARIS Process Performance Manager Analysis UI 10.5.10

RELEASE DATES AND KEY INFORMATION

General Availability (GA): 2024-10-29

End of Maintenance (EOM): 2027-10-30

Required license key: 10.0

2 System requirements

2.1 Supported Server OS Platforms

Applicable for ARIS Process Performance Manager (Server) and ARIS Process Performance Manager Download Client

- Windows Server 2019
- Windows Server 2022
- Linux RedHat ES 8.x
- Linux RedHat ES 9.x
- SUSE Linux ES 15

Planned for next release:

- Windows Server 2025

2.2 Supported Client OS Platforms

Applicable for ARIS Process Performance Manager Analysis UI

- Windows Server 2019
- Windows Server 2022
- Windows 11
- Windows 10

2.3 Supported DBMS

- IBM Db2 LUW 10.5
- IBM Db2 LUW 11.5
- MS SQL Server 2022
- MS SQL Server 2019
- MS SQL Server 2017
- Oracle 12c
- Oracle 19c

NOTES

Use the latest JDBC driver versions for all DBMS that are Java 17 compatible.

2.4 Supported Web Browser

- Google Chrome
- Microsoft Edge
- Mozilla Firefox

2.5 Supported LDAP systems

- Active Directory Domain Services Windows 2019 Server
- Active Directory Domain Services Windows 2022 Server
- IBM Tivoli Directory Server 6.1
- Net IQ eDirectory 8.8 SP8
- Oracle Directory Server Enterprise Edition 11g

2.6 Supported cloud providers

- Amazon EC2 64-bit
- Microsoft Azure

2.7 Supported Single Sign-On technology

- Kerberos

2.8 Supported Hypervisor

- VMware ESXi 6.5 and 6.7

2.9 Supported JDK

- Windows / Linux Zulu Java 17

3 Languages

Supported languages for ARIS Process Performance Manager 10.5.10

- Chinese (simplified Chinese)
- English
- French
- German
- Japanese
- Portuguese (Brazilian Portuguese)
- Russian

4 Compatibility

ARIS Process Performance Manager 10.5.10 is compatible with the following other products of Software GmbH:

- ARIS 10.0 SR27
- MashZone NextGen 10.15

5 Virtual Machine Support

"Software GmbH provides for all its software the definitions of supported, documented platform configurations (referred to here just as 'supported platform') which will include specific Operating System (OS) and hardware configurations and may include Java Virtual Machine (JVM) and database versions. Customers can use a commercially available virtualization environment for a Software GmbH production environment if it accurately and completely emulates one of the supported platforms.

Customers who use virtual environments are required to comply fully with their contractual terms and conditions for licensing.

Software GmbH tests its software for operation on the supported platforms and not specifically against all possible combinations of hardware that might be comprised that operating system (for example, file system, disk controllers, memory configuration, display devices and so on). Therefore, the correct expertise, provision and management of a hardware configuration to support the platform remain the responsibility of our customers, whether directly using physical hardware or a virtualization environment. Software GmbH recommends physical hardware or, if ARIS products are used in a virtual environment, sufficient resources must be available to avoid the risk of overbooking.

Software GmbH tests and supports certain products in the specific virtualized environments listed in the system requirements section of the product documentation. Customers can use a different virtualized environment that accurately and completely emulates one of the supported platforms; however, if they encounter an issue that Software GmbH judges might be caused by the virtualized environment, then the customer is responsible for reproducing the issue on an actual supported platform before further analysis can take place. Software AG Global Support will refer customers to the Global Consulting Services group for guidance or recommendation about the use of virtualization software, or, if required, the best approaches for copying a system to a supported platform."

6 Legal information

6.1 Documentation scope

The information provided describes the settings and features as they were at the time of publishing. Since documentation and software are subject to different production cycles, the description of settings and features may differ from actual settings and features. Information about discrepancies is provided in the Release Notes that accompany the product. Please read the Release Notes and take the information into account when installing, setting up, and using the product.

If you want to install technical and/or business system functions without using the consulting services provided by Software GmbH, you require extensive knowledge of the system to be installed, its intended purpose, the target systems, and their various dependencies. Due to the number of platforms and interdependent hardware and software configurations, we can describe only specific installations. It is not possible to document all settings and dependencies.

When you combine various technologies, please observe the manufacturers' instructions, particularly announcements concerning releases on their Internet pages. We cannot guarantee proper functioning and installation of approved third-party systems and do not support them. Always follow the instructions provided in the installation manuals of the relevant manufacturers. If you experience difficulties, please contact the relevant manufacturer.

If you need help installing third-party systems, contact your local Software GmbH sales organization. Please note that this type of manufacturer-specific or customer-specific customization is not covered by the standard Software GmbH software maintenance agreement and can be performed only on special request and agreement.

6.2 Support

If you have any questions on specific installations that you cannot perform yourself, contact your local Software GmbH sales organization (<https://www.softwareag.com/corporate/company/global/offices/default.html>). To get detailed information and support, use our Web sites.

If you have a valid support contract, you can contact **Global Support ARIS** at: **+800 ARISHELP**. If this number is not supported by your telephone provider, please refer to our Global Support Contact Directory.

For issues regarding the product documentation, you can also send an e-mail to documentation@softwareag.com (<mailto:documentation@softwareag.com>).

ARIS COMMUNITY

- Download products, updates and fixes
- Find information, expert articles, issue resolution, videos, and communication with other ARIS users

If you do not yet have an account, register at ARIS Community.

PRODUCT TRAINING

You can find helpful product training material on our Learning Portal.

TECH COMMUNITY

You can collaborate with Software GmbH experts on our Tech Community Web site. From here you can, for example:

- Browse through our vast knowledge base.
- Ask questions and find answers in our discussion forums.
- Get the latest Software GmbH news and announcements.
- Explore our communities.
- Go to our public GitHub and Docker repositories and discover additional Software GmbH resources.

PRODUCT SUPPORT

Support for Software GmbH products is provided to licensed customers via our Empower Portal (<https://empower.softwareag.com/>). Many services on this portal require that you have an account. If you do not yet have one, you can request it. Once you have an account, you can, for example:

- Add product feature requests
- Search the Knowledge Center for technical information and tips
- Subscribe to early warnings and critical alerts
- Open and update support incidents.
